Story of Dr.G

Everyone deserves healthy and beautiful skin

Dr. Ahn, the founder of Dr.G, became a dermatologist after experiencing painful burns as a child. His personal struggle with skin damage inspired him to help others suffering from skin concerns. In 1998, he established Gowoonsesang Clinic - Korea's first dermatology clinic. This clinic became the foundation of the Dr.G brand developed upon his extensive expertise and firsthand experience as both a patient and a doctor.

Mission

Create a Healthier, More Beautiful World Through Dermatology

As a brand rooted in dermatology, we have conducted over 1 million dermatological studies over the past 20 years. Instead of simply following trends by using popular ingredients, Dr.G is committed to developing reliable and effective products through rigorous scientific research.
